Glass and leather goes well with the light Nordic style. The combination of these materials also allows the light to visually interact with a modern interior, where combining materials is one of the biggest current trends. With Strap it seems obvious – just as obvious as how a Nordic light design is named after a leather strap. The narrow and elegant leather gives Strap both a warm and raw look, which balances between the classic and the industrial. It comes with two leather straps in brown and black respectively, so it's up to you to give your Strap the final look. Design by Bjørn + Balle.
