2835 SMD

192 LEDS LED Strip 24V

1P 33 5 years

#### Model: RD0064TC/RD00C8TC/RD00K2TC

5000\*10, 320pcs 2835 SMD LED, bare board series with high luminous efficacy, 24Vdc, constant voltage, LED flex strip 5000\*10, 640pcs 2835 SMD LED, bare board series with high luminous efficacy, 24Vdc, constant voltage, LED flex strip 3000\*10, 576pcs 2835 SMD LED, bare board series with high luminous efficacy, 24Vdc, constant voltage, LED flex strip

## Figure:

#### Features:

- OLuminous efficacy 160lm/W, high efficiency and saving energy;
- OSpectroscopic standard ERP, one BIN only, good color uniformity;
- OLED constant current driver, low attenuation;
- Strong oxidation resistance by silver;
- Silver-Tin pad design, easy soldering;
- O CE, ROHS, UL compliant

## **Applications:**

O Suitable for hotel, shopping mall, home, cabinet, show frame, etc. as main lighting, indirect lighting, cove lighting, contour lighting, decorative lighting, etc.

## Warranty:

0 5 years or 22,000 hours, whichever comes first.

## **Optical and Electrical Parameters:**

| P/N            | Beam LED CT (K) us  V CRI SDCM Angle |         | Lumino<br>us Flux | Luminou<br>s | Workin<br>g | (m                 | rent<br>A)         | (W/p             | wer<br>iiece)       |                      |                     |                      |

## **Packaging Diagram:**

## **Connection Instruction:**

Note: Please connect the '+' and '-' of strips to those of driver output correctly.

## **Parts & Tools:**

## Product Spare Parts

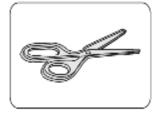

LED Strip

## Self-provided Tools

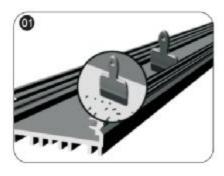

Electrical Drill & Drilling bit

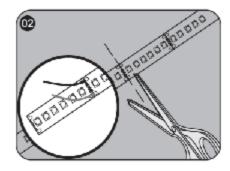

Scissors

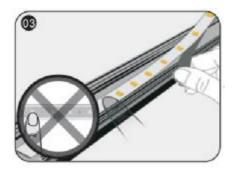

## **Installation Steps & Cautions:**

 Make sure the mounting surface is clean before installation;

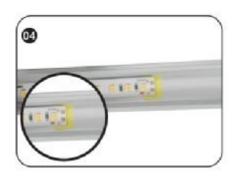

Calculate the needed length and cut off the extra length along cutting mark if necessary; if need to add wires, please weld them at the next location with printed mark

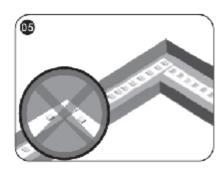

While sticking strips, peel off the release paper of the tape step by step. Don't peel off all release paper at a time to avoid getting your strip in a mess.

△Notes: No pressing the bead!

 Stick Mylar tape to isolate the cutting position from the bottom of profile inner slot to avoid short-circuit;

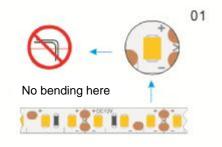

The installation at the corner is shown as the above figure.

 $\triangle$  Notes: No bending it into right angle; No twisting it to stick on the mounting surface.

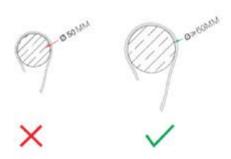

O Connect strip wires to the output terminal of power supply, and dispose with waterproof, insulation, short-circuit and anti-corrosion protection at both the wire joints and the cut section of your strip (if any).

 No bending the strip at the position of LED

No twisting the strip

No winding an object with a diameter <5cm.</li>

## **Optional Parts:**

# **Troubleshooting:**

| Malfunctions                         | Possible Causes  | Solutions   |  |  |  |
|--------------------------------------|--|---|--|--|--|
|                                      | The power supply did not connect to power grid.  | Power on  |  |  |  |
| All LEDs don't work                  | No electricity due to short-circuit of external power supply.                                      | Remove the malfunction caused by short-circuit, power on again.   |  |  |  |
|                                      | The wires of strips connect to power supply output reversely.                                      | Check the connecting and ensure the wires are connected correctly.  |  |  |  |
| Part of LEDs don't work              | Part of power supplies do not have output.     Part of wires of strips have malfunction.           | Check the power supply system.  |  |  |  |
|                                      | Particular modules connected reversely.  | Correct connection  |  |  |  |
|                                      | Overloaded power supply;   | Replace it with higher power supply   |  |  |  |
| Brightness of LEDs is weak or uneven | The power loss of power circuit is huge or the power loss of each circuit existing big difference. | Ensure working voltage of strips is within±5%V of rated voltage.  (1. Shorten the length of wires between the first strip and power supply or replaced with wires with bigger diameter; 2. Ensure the cascading qty of string is less than or equal to the allowed maximum cascading qty, and each strip cascading qty is well-balanced.) |  |  |  |
|                                      | 3. Exceed in qty of strips in series   | Lessen the cascading qty for strip and ensure the qty for each electrical circuit is within the maximum cascading qty.  |  |  |  |
| LEDs are blinking                    | <ol> <li>Poor contacted in the joints.</li> <li>Failures in power supply.</li> </ol>               | Find out and tackle malfunction immediately.  Power on  |  |  |  |

## **Declaration:**

- O If the external flexible cable of light box is damaged, please replace it by its manufacturer or its service agent or qualified person to avoid a hazard.
- The specific installation and cautions please refer to the user manual.
- The given data in this specification is based on our standard product. There may be existed slight difference compared with actual products.
- All Illustrations in this specification are for reference only.
- This product is subject to change or modify without prior notice.
- ORISHANG OPTOELECTRONICS CO., LTD reserves the right of final explanation for this specification.
